

- **Electric Drive System-** Effective and energy saving electric drive system features zero emission and low noise, enabling this machine easily to work in enclosed environments such as office building, hospitals and schools and minimizing the effect on environment.
- **Narrow Structure-** Narrow structure design enables the complete vehicle to easily pass through a single gateway; foldable fence could make the transportation easier.
- **Emergency Descend Button-** The safety feature allows you to bring down the platform in case of power failure.
- **Over Loading Limit-** Ensure the safety of occupants.
- **On Demand Extendable Platform Available.**

- **Control System-** Convenient on Platform control for moving up and down.

On Demand Custom Specifications are Available
